

New Discoveries in *Mayflower* Genealogy

Uncovering Mayflower Connections through DNA

Christopher C. Child, cchild@nehgs.org

The table below reflects passengers (and senior generation spouses) who are discussed in the lecture and who are part of *Mayflower* families leaving American descendants. Only male passengers are given Y-DNA haplogroups, and only female passengers are given mtDNA haplogroups, except for sons of female passengers with known haplogroups.
